## SENSORY INTEGRATION INVENTORY REVISED FOR INDIVIDUALS WITH DEVELOPMENTAL DISABILITIES

Appropriate for all ages, this Inventory and accompanying User's Guide is a preliminary assessment for occupational therapists who serve people with developmental delays and disabilities. It is designed to screen for clients who might benefit by a sensory integration treatment approach. Since these behaviors are not addressed in standardized assessments and the behaviors themselves interfere with formal test taking skills, this is an effective and appropriate tool for this population. This tool provides information on the subject's sensory processing abilities and specific self-stimulating or self-injurious behaviors.

## BRICK STICK CHEWABLE PENCIL TOPPER

Large bumps on the front, small bumps on the back for varied sensory input. Each topper measures about 2.5" long, .6" wide, and .5" thick. Comes with an eraser-less pencil. Available in 3 color-coded toughness levels:

- Standard - This is the softest level, recommended for mild chewers (those who do not chew through anything).
- XT / Medium Firm - This is the middle level, which we call XT (Xtra Tough). It's firmer, but still fairly chewy, recommended for moderate chewers.
- XXT / Very Firm - This is the toughest level, which we call XXT (Xtra Xtra Tough). It still has some chewability to it, but it's fairly rigid / pretty firm. No chew tool is indestructible, but this is usually the longest lasting level for avid chewers.

## FOOTFIDGET 2.0 - FOOTREST ATTACHMENT

leaves hands free for classroom work. The Attachable Foot Fidget can be used with most existing classroom desks with minimal adjustments.

A Second generation FootFidget® with quick and easy installation and same great results! A Dynamic Attachable FootRest that attaches to 4 legs of existing desk with snap on sleeves. Provides safe, ergonomic placement in middle of desk space. 3 adjustable heights for comfort.

Design is black, quiet and non-distracting in the classroom. Quick and easy to install-no tools needed.

- THC72801** FootFidget 2.0 - FootRest Attachment. . . . . **\$29.99**

The rule-of-thumb for the measurement of our Standing Desk Conversion Kits are:

- Grades K-2 generally will require a 19" length desk leg. This length only comes in a 1" diameter leg size. Often with these younger/shorter students, raising their desk to the highest level may be high enough to stand at (should be elbow height) and then you can get an Attachable FootFidget and they will be all set!
- Grades 3 – 8 generally will require a 24" length desk leg extension. This length comes in both the 7/8" and 1" diameter leg size.
- Grades 9 – 12 will typically require the PORTABLE FOOTFIDGET due to their height, weight and the fact they move from classroom to classroom during the school day.

When ordering, PLEASE take into consideration the age and heights of students who will be using the standing desks, and if it will be used by more than one student. One size may not 'fit' all the various heights of students in one classroom. Having at least 2 desks of different heights will ensure all students will be able to utilize them on a rotating basis.

### WEIGHTED ANIMALS BY MANIMO

Cuddly and adorable, manimo animals are there for children both in times of stress and when relaxing. Their weight soothes, comforts and helps the child better understand where

their body is in space (spatial awareness). A manimo's heaviness causes the same sensation as deep touch pressure.

Five manimo models are available, in several colors. They weigh between 2.2 lbs. and 5.5 lbs. and are for children ages three and up. Due to the weight of the animals, we recommend using them for 15-20-minute periods. If used longer, the body will grow accustomed to the sensation, which will reduce the beneficial effects over time.

Our newest addition Turquoise Turtle! It's also our very first 2 in 1 animal. Body and shell pieces each weigh 1 kg and may be placed on different areas of the body, for an all-around comforting experience. Reminiscent of the ocean in her turquoise shiny and silky fabric, our turtle will provide a deep sensory relief and relax body and mind. Lovable, embracing... it will become a favorite among children and adults!

## THE ALERT PROGRAM

An innovative program by Mary Sue Williams, OTR and Sherry Shellenberger, OTR, that supports children, teachers, parents, and therapists to choose appropriate strategies to change or maintain states of alertness. Students learn what they can do before a spelling test or homework time to attain an optimal state of alertness for their tasks.

### AN INTRODUCTION TO "HOW DOES YOUR ENGINE RUN?"

This booklet is an excerpt from the first chapter of the Leader's Guide. Teachers often give the booklet to a parent to share what Alert Program concepts the student is learning at school. Provides a brief overview of the theory and key concepts of the Alert Program in an easy to understand fashion. 17 pgs.

**PP11701** *An Introduction to HDYER* ..... **\$7.50**

### TAKE FIVE! STAYING ALERT AT HOME & SCHOOL

Intended for teachers and parents. Sensorimotor activities and other strategies are presented in an easy-to-read fashion to support children's engines to "run just right" at home and school. Teachers and parents love the practical ideas to help children "take five".

In addition to learning ideas for quick movement breaks, adults will expand their repertoire of self-regulation strategies to sustain students' levels of alertness. An ideal resource to support the use of the Alert Program. 86 pgs.

**PP11703** *Take Five!* ..... **\$30.00**

### TEST DRIVE: INTRODUCING THE ALERT PROGRAM THROUGH SONG

This book and CD, with its appealing songs to support children's self-regulation, is full of practical ideas and suggestions. Test Drive is the simplest way to introduce the Alert Program concepts

to children in schools, homes, or therapy settings. The Test Drive book walks you through exactly how to introduce the Alert Program analogy and vocabulary to a group of students at school or to an individual at home.

**PP11704** *Test Drive Book & CD* ..... **\$35.00**

### HOW DOES YOUR ENGINE RUN?: A LEADER'S GUIDE

The Leader's Guide contains everything needed to implement the Alert Program: it explains the theory, along with step-by-step instructions and easy-to-implement activities. It was written to teach children how to identify and change how alert they feel, initially using the analogy of an engine.

If a child is non-verbal or has special interests (such as a love of dinosaurs), instead of using the engine analogy, the program can be customized and easily adapted.

The Alert Program consists of a series of lessons and activities, that when incorporated with sensory processing techniques, has proven to be highly effective. The program has been adapted successfully for preschool through high school students and for adults. 132 pgs.

**PP11702** *Leader's Guide* ..... **\$40.00**

### KEEPING ON TRACK: ALERT PROGRAM COMPANION BOARD GAME

If you are geared up to use what you've learned through the Alert Program, this enticing board game is for you! All players are drivers with engines, traveling around a course, set to check in

regularly on their internal engine speeds. Are they speeding or idling? What can they do to run "just right?"

**PP11705** *Keeping On Track Game* ..... **\$45.00**

## LOOPS AND OTHER GROUPS: A KINESTHETIC WRITING SYSTEM

Mary D. Benbow, M.S., OTR/L

Help your 2nd grade through high school students with learning disabilities and perceptual delays learn cursive writing- along with their non-disabled peers in a typical

mainstreamed classroom.

Letters are taught in groups that share common movement patterns. For example, a, d, g, q, and c can be visualized on a clock face, and are called "Clock Climbers". Easy to remember motor and memory cues help students visualize and verbalize while experiencing the "feel" of the letter.

Most students can learn formations of all lower-case letters in just six weeks! Groups include Clock Climbers, Kite Strings, Loop Group, and Hills and Valleys.

The Complete Kit includes: 86 page Instructor's Manual, 30-page Alphabet Models and Letter Groups Manual, and one each of the Level 1 Booklet and Level 2 Booklet.

## Z-VIBE (FORMERLY CALLED THE DnZ-VIBE)

The Z-Vibe comes with a textured plastic handle, providing a slip-proof grip. This end of the handle is sealed off from the internal components so that no saliva, water, or moisture can compromise the unit from that end.

You can use it as the Z-Vibe with one tip, or as a double Z-Vibe simply by unscrewing the switch end, and connecting another tip instead. ## CIP-KUP ASSEMBLY

**WARNING: Choking Hazard - small parts. Not for children under 3 years.**

This 8 oz. soft cup is uniquely designed to allow individuals to learn or re-learn straw drinking with less effort. The Select-Flow Valve included with each Cip-Kup ensures that fluid will remain in the straw

without flowing back into the cup, thereby reducing the chance of coughing or choking. Keeping fluid in the straw is also great for individuals with a weak suck, and it can make the move from bottle-feeding to cup drinking an easier transition as well. Simply squeeze the fluid to the desired height and release. Try using the Cip-Kup with one of our Lip Bloks to work on lip and tongue position.

The Cip-Kup Assembly includes: 1 flexible Cip-Kup Bottle, 8" of Special Polytube, 1 Lip Blok (3/4"), 1 Select-Flow Valve, and 12 clear straws.

- DT0114** Cip-kup . . . . . **\$19.99**

## SIP-TIP WITH ONE WAY STRAWS

**THIS IS A LATEX-FREE PRODUCT**

**WARNING:** Choking Hazard - small parts. Not for children under 3 years.

The Sip-Tip is another great product available to augment your feeding therapy plan. The lids snap on securely to the rigid, high-quality tumbler to minimize spillage. The liquid moves up the straw when the plastic lid is pressed or

when the person takes a sip. The valve keeps the straw full of liquid. This reduces the amount of energy needed to bring liquid into the mouth. Individuals can learn to drink with greater control of the liquid flow. The lid stabilizes the straw for easier oral-motor control.

The One-Way Straws have a unique valve built into the bottom of the straw that controls the flow of liquid - fluid flows up into the straw, but does not empty back into the cup. Because fluid stays at the top of the straw, less air is ingested and less effort is required for each sip.

The set includes: 1 eight oz. tumbler, 1 spill-resistant lid, 10 One-Way Straws, and 1 Lip Blok (yellow, 3/4").

**DLE31705 Sip-Tip with One Way Straws . . . . . \$21.50**

## ONE WAY STRAWS

These straws have one-way valves in them that make

drinking easier for individuals with problems generating and maintaining suction. They reduce the air ingested and the effort required for sucking. Promotes independence and dignity while increasing hydration. This product is not recommended for carbonated beverages. Straws are 8" long.

**DLE0619 10 pack . . . . . \$11.99**

## PREMIUM ONE WAY VALVE

**WARNING:** Choking Hazard - small parts. Not for children under 3 years.

A lifetime valve to be used with either our Cip-Kup Assembly or Sip-Tip cups.

The valve is made out of high grade stainless steel and will not rust!

**DLE31714 Premium One Way Valve . . . . . \$24.99**

## SIP-TIP WITH SELECT-FLOW VALVE

**THIS IS A LATEX-FREE PRODUCT**

**WARNING:** Choking Hazard - small parts. Not for children under 3 years.

The Sip-Tip makes drinking easier for individuals who have difficulty generating and maintaining suction. An individual can either suck from the straw themselves, or you can assist by "pumping" the fluid up the straw with the flexible lid.

Simply cover the vent hole with your finger and press down several times until the liquid reaches the desired height. The Select-Flow Valve will keep the straw full of fluid, thereby reducing the air ingested and the effort required for each sip. With the Sip-Tip, users tend to experience less coughing and choking while consuming more fluids.

Set includes: 1 eight oz. tumbler, 1 spill-resistant lid, 1 Select-Flow Valve, 10 regular straws, and 1 Lip Blok (yellow, 3/4").

**DLE31707 Sip-Tip with Select-Flow Valve . . . . . \$15.99**

## SELECT-FLOW VALVES

**THIS IS A LATEX-FREE PRODUCT**

**WARNING:** Choking Hazard - small parts. Not for children under 3 years.

Make drinking easier for beginners and/or individuals with oral motor difficulties.

It's uniquely designed to control the direction of fluid - liquid flows up into the straw, but does not flow back down. Because fluid stays at the top of the straw, each subsequent sip requires less effort. It also reduces the air ingested, so users experience less coughing and choking while consuming more fluids. Measures approximately 1.75" in length. Recommended for use with the Cip-Cup and Sip-Tip, as these cup sets let you "help" fluid up the straw for the initial sip

## RULES AND TOOLS: TEACHING OF LANGUAGE USE IN YOUNG CHILDREN'S PLAY AND LEARNING

The Rules and Tools Curriculum is a developmentally sequenced set of 68 pragmatic rules that help young children learn and generalize competence in social interaction as they play and interact. The purpose of this curriculum is to increase the

number of successful communication exchanges that occur during natural interactions with peers and adults.

Two features make Rules and Tools unique:

- 1) It teaches generalizable social behaviors (Rules) that a child can learn to apply to any interaction and;
- 2) It uses concrete teaching strategies (tools) that allow an interventionist to prompt abstract behaviors with minimal cueing, thereby promoting generalization to other settings. By "concrete" is meant that the tools are multi-sensory: for each Rule, there are songs, chants, pictures, and sometimes gestures or objects, that help children understand the abstract pragmatic concept.

The author has grouped the 68 Rules according to their social function, i.e. Skill Set with 4 Rules fitting into each Rule Set.

Each Rule includes the following components: A Teaching Picture; Scripts for Teachers Role Play; Teaching Chants; Teaching Songs (a CD is included with children singing some of the songs); Concrete Representation of Rules; Teaching Gestures; and Letters to Parents.

The two CDs from Imitation Exploration contain 30 songs that focus on developing imitation and interaction in children at the beginning stages of communication. The vocabulary is simple and repetitive and focuses on words that are common in a child's world. Although both CDs have the same basic

objective of imitation practice, the style is quite different. Some children find it easier to sing than to speak, and vice versa, so some of the songs are sung and others are spoken with rhythm and music in the back-ground. Adults and kids sing together on this CD, and the cue, your turn, is used frequently to entice imitation. A manual of activities and a CD-ROM of hundreds of printable visuals complete this set. ### BECOMING VERBAL WITH CHILDHOOD APRAXIA

Let's face it: Apraxic children are a puzzle. Their speech and language problems can baffle parents, teachers and therapy professionals. Based on the observations of Jean Piaget and his pioneering research into the development of imitation in young children, this book illustrates new, effective methods that have helped many of these children to: acquire speech,

dialogue with others, watch for and expect responses from others, develop consonants and vowels and rehearse and master their own productions. The author's techniques have been sharpened by over two decades of helping nonverbal apraxic children become more active in their own therapy and become highly verbal. 110pp.

facilitate therapy for the emotional, physical, and cognitive aspects of stuttering.

Students practice skills in a fun, comfortable environment with games like Go Fish, War, Pyramid, and more! The games can supplement any fluency program including a "speak more fluently," "stutter more fluently," and "integrated approach."

adolescent themes and familiar fluency disruptors. Addressing these commonalities will increase your student's participation and interest. The stimulus items on the back of each card reflect a well-designed fluency program.

The cards are organized in a hierarchy of fluency skills with easier skills addressed in the beginning sets. Each strategy is taught in small, progressive steps using sets of 3-6 cards. Choose a starting point based on your student's therapy goals/ability level. The last set of cards target transfer and maintenance skills.

### EASY DOES IT FOR FLUENCY: INTERMEDIATE

Ages: 6-12 / Grades: 1-7

Students take an active role in their therapy and develop fluent speech through motor, linguistic, and psychosocial changes. This comprehensive program spells out

a clear therapy program and shows you how to tailor treatment to individual student needs.

Easy Does It for Fluency: Intermediate is a direct approach to therapy. The focus is on forward flowing speech or word-initiation techniques, or both, depending on the needs of the student. The student takes an active role in identifying what he does when stuttering and determining what needs to be changed. Students are encouraged to verbalize goals and behaviors, self-monitor, and self-reinforce.

Three potential components of stuttering are addressed: Motor, Linguistic, and Psychosocial. The program is organized around six levels of progress: Getting Ready, Analyzing, Modifying Speech Production, Desensitizing, Transferring, and Maintaining.

This second edition is a comprehensive update to the original book. It updates our understanding of executive dysfunction (EDF) and provides a clear structure evaluating and treating EDF. New chapters clarify executive dysfunction as it complicates the academic, social, and communication performance of children with a wide range of disorders. **HELPING STUDENTS TAKE CONTROL OF EVERYDAY EXECUTIVE FUNCTIONS: THE ATTENTION FIX**

This book presents an innovative model for strengthening and developing executive function in any student, including those with attention, memory, organization, planning, inhibition, initiative, and flexibility difficulties. It provides guidance on how to support each student's evolving executive function, and how to encourage those who are ready to develop self-advocacy and become more responsible for the development of his or her own executive function skills.

The author advocates a student-centered approach in which educators first explore eight key "ingredients" with the student: relationships, strengths and weaknesses, self-advocacy and responsibility, preview and review, motivation and incentive, synthesis and analysis, rhythm and routine, and practice and repetition. She provides step-by-step explanations of how the educator and student can then explore and use these "ingredients" in different ways and in different combinations to successfully address particular areas of difficulty.

**THE SOCIAL SKILLS PICTURE BOOK: TEACHING PLAY, EMOTION AND COMMUNICATION TO CHILDREN WITH AUTISM**

Depicts, step by step, children demonstrating various social skills. Each skill is formatted sequentially, similar to a cartoon strip, with digital pictures of actual children combined with text and cartoon bubbles to denote what the children are saying - and sometimes thinking - as they engage in the skill. Included are the right (and sometimes the wrong) way to act with accompanying text that enhances the learning experience. These pictures provide a means to compensate for the inherent difficulties many autistic individuals share. They make explicit what to do and say in social situations.

Most significantly, they visually illustrated the positive and negative consequences of both ways of interacting. 2) In addition the book offers a way for students and families to create their own Social Skills booklets. Students are encouraged to use photographs of themselves to create a booklet for each skill they learn. 3) Real life situations are presented that are important to teens, such as Making new friends, Asking for help when needed, Interviewing for a job, Asking someone out on a date, Respecting each other space...and much, much more!
