ORAL AND WRITTEN LANGUAGE SCALES—2ND EDITION (OWLS-2)

Building on the strong theory and research underpinning the original OWLS, the Second Edition of this highly regarded test offers an integrated, global approach to language assessment. The OWLS-II adds a Reading Comprehension Scale, updated norms, new items, a parallel form, improved scoring guidelines, and full-color stimulus materials. Moreover, a helpful new handbook, Foundations of Language Assessment, explains the theory upon which the OWLS-II is based, making it easier to understand the test and interpret results. Measuring four language processes--separately and in relation

to one another--this Second Edition gives you the most complete, accurate, and useful picture of language skills currently available.

The OWLS-II evaluates four language processes on four separate scales: Listening Comprehension, Oral Expression, Reading Comprehension, and Written Expression.

Because it looks at the same linguistic structures across four distinct language processes, the OWLS-II provides an unusually detailed, coherent, and integrated assessment. Although its four scales can be used separately, together they give you a comprehensive score profile that pinpoints language delays, identifies strengths and weaknesses in all areas, and guides intervention.

Comprehensive, easy to administer, linked to classroom instruction, and rooted in an integrated theory of language, the OWLS-II provides the information you need to identify and remediate oral and written language problems.

THE LISTENING COMPREHENSION TEST 2 (LCT 2)

Because children need the basic skill of listening in order to succeed in school and in life, each subtest on The Listening Comprehension Test 2 requires students to pay attention; listen with a purpose in mind; remember what they hear well enough to think about it; avoid being impulsive in giving answers; and express answers verbally. The test models the type of listening required in the classroom. The student must determine what part of the message needs immediate attention, organize and understand the input, and plan appropriate responses.

LANGUAGE PROCESSING TEST 3—ELEMENTARY (LPT 3)

Use the Language Processing Test 3 Elementary (LPT3) to diagnose language processing disorders in underachieving children. The test evaluates the ability to attach increasingly more meaning to information received to then formulate an expressive response. The skills evaluated are discrete and carefully controlled, beginning with simple tasks and progressively increasing the language processing demand placed upon the student. This hierarchical approach ensures evaluation of prerequisite skills for increasing demand. There are two pretest and six subtests. Each subsequent subtest builds on the

TREATMENT PROGRAM FOR CHILDHOOD APRAXIA OF SPEECH

Use the Treatment Program for Childhood Apraxia of Speech to apply the principles of motor planning to the treatment of childhood apraxia of speech (CAS). Designed for speech-language pathologists, the program

comes complete with detailed instruction manual, 2000 stimulus pictures, and tactile-kinesthetic cue cards.

The 65-page manual shows you how to establish motor learning for different syllable shapes and pattern sequences, incorporate research-based principles into therapy organization and goal selection.

The Treatment Program for Childhood Apraxia of Speech contains both stimulus cards and tactile-kinesthetic cue cards. To use the tactile-kinesthetic cue cards students produce a variety of phoneme sequences while moving one finger along a visual representation of the movement sequence. All cards are coated, so you can write target sound sequences on them with a dry-erase marker.

SOCIAL LANGUAGE RULES & TOOLS: A PRESCHOOL CURRICULUM

★ A THERAPRO ORIGINAL! ★

A developmentally sequenced set of 68 pragmatic rules that help young children learn and generalize competence in social interaction as they play and interact. The purpose of this curriculum is to increase the number of successful communication

exchanges that occur during natural interactions with peers and adults.

Social Language Rules & Tools teaches generalizable social behaviors (Rules) that a child can learn to apply to any interaction and uses concrete teaching strategies (Tools) that allow an interventionist to prompt abstract behaviors with minimal cueing, thereby promoting generalization to other settings. By "concrete" is meant that the tools are multi-sensory: for each Rule, there are songs, chants, pictures, and sometimes gestures or objects, that help children understand the abstract pragmatic concept.

SENSORY SPOON

The only spoon available that focuses on the development of self-feeding with infants as young as 7 months. At this age, infants are curious and interested in handling objects and

bringing them to their mouths in exploration - the perfect age to introduce a colorful, tactilely pleasing object that is safe and functional!

The Sensory Spoon features a safe sensory experience when exploring spoon with mouth. The short, textured handle offers sensory input to the palm for grasping; a bumpy texture between the rings provides greater tactile input for little hands, and a natural "stop" prevents gagging or deep insertion into the mouth.
